

Bishop Feehan High School

Temporary Classroom Space

Bishop Feehan High School needed extra classroom space while renovating its convent into new classrooms and addressing growing enrollment. Triumph provided the school with six classroom modules totaling 4,320 square feet and construction and project management services. The new modules are adjacent to the existing school building for easy student and staff access. The entire project, from permit application to certificate of occupancy, was completed in just three months.

“Triumph provided an excellent service at a very competitive price,” said Bill Runey, Principal of Bishop Feehan High School. “The teachers and students have been very pleased with the units and new classroom space”
