

Aggregate Industries

Permanent Scale House

Triumph Modular supplied Aggregate Industries with a custom modular 12' x 60' scale house in Littleton, MA. The custom modular structure accommodates a team of three to four employees daily, handling both inbound and outbound traffic for the sand, stone, and gravel operations.

The space features two heavy-duty drive-up windows with transaction drawers designed to withstand the constant opening and closing required for each business transaction. This custom application also protects the drivers on the scales and the dispatcher in the trailer from weather elements while reducing the duration of each transaction.
